

2009–2010 COURSE OFFERINGS

BUSINESS ANALYST ESSENTIALS (Ouellette & Associates)

BUSINESS REQUIREMENTS MANAGEMENT

November 12-13, 2009
(3rd day on December 4, 2009)

April 5-6, 2010
(3rd day on May 4, 2010)

This three-day workshop will provide participants with easy-to-use tools and up-to-date techniques to successfully define and manage business requirements on any project.

CONSULTING SKILLS FOR THE IT PROFESSIONAL

February 4-5, 2010

June 10-11, 2010

For IT management and their staffs, this two-day course will show IT professionals how to operate as internal consultants to more effectively fulfill the role of your company's "IT supplier of choice."

Note: CIMS/Ouellette Business Analyst Essentials consists of two courses: *Business Requirements Management* which is offered in 2-day and 1-day modules with project application experiences between modules, and *Consulting Skills for the IT Professional* to be offered two months later. Students who complete both courses will receive a CIMS/Ouellette "Business Analyst Essentials" certificate and an extra \$150 discount off the tuition of the second course.

Three-day course FEE \$1,895 for CIMS affiliation* and \$2,095 for nonaffiliated

Two-day course FEE \$1,450 for CIMS affiliation* and \$1,600 for nonaffiliated

MEASURING THE ROI FROM TECHNOLOGY (Nucleus Research, Inc.)

This unique ROI boot camp is designed for professionals who want to learn about metrics used to assess technology, the process for assessing benefits and costs, and effective ways to present a business case for a technology investment. The course is approved by the National Association of State Boards of Accountancy (NASBA) for CPE credits for CPAs.

October 6-7, 2009

May 11-12, 2010

Two-day course FEE \$1,450 for CIMS affiliation* and \$1,600 for nonaffiliated

For more information call the CIMS office at 781-239-4531.

To enroll email stoff@babson.edu or kschaus@babson.edu.

PROJECT MANAGEMENT COURSES (Learning Curve Associates)

LEADING PROJECT TEAMS: THE HUMAN SIDE OF PERFORMANCE

November 3-4, 2009

March 11-12, 2010

This two-day workshop provides the knowledge, tools, and practical experience for participants to move from an individual contributor to a capable and confident project team leader.

MANAGING RISK AND MAKING DECISIONS

December 3-4, 2009

April 8-9, 2010

Through this engaging two-day session, participants learn about the relationship between risk and opportunity—and the difference between risk and uncertainty. The program covers both front-end risk planning and on-going risk response and control during project execution, as well as techniques to keep risks from recurring or becoming worse.

PROJECT MANAGEMENT PROFESSIONAL (PMP®) EXAM PREP

January 28-29, 2010

This comprehensive two-day course provides an intensive review of the knowledge areas that form the basis of the PMP® Certification examination. The program was developed by and is facilitated by an author of the original *PMBOK®* Guide.

FIVE SIGMA® PROJECT MANAGEMENT - Date to be determined (see note below)

This comprehensive introductory three-day program shows participants how to combine sophisticated cost and schedule estimation with the latest business thinking on managing the project's progress to achieve strategic business results.

Note: This course will be conducted for a minimum group of six (6) students. The class will be scheduled to suit the attendees when the minimum is reached. With sufficient demand, we expect to schedule a class in early 2010.

Two-day course FEE \$1,450 for CIMS affiliation* and \$1,600 for nonaffiliated

Three-day course FEE \$1,895 for CIMS affiliation* and \$2,095 for nonaffiliated

SOFTWARE FUNCTIONAL DESIGN FOR IT PROFESSIONALS

(Ruth Gilleran, Babson College, and Stephen Laster, Harvard Business School)

This interactive, hands-on course provides real world skills, tools, and techniques valuable to anyone participating in the system development life cycle of a software project. You will leave this program with a rich set of design tools and will be able to write use cases, produce CRUDL tables, draw data flow diagrams, develop navigation maps, build lightweight prototypes, and maintain a project Traceability Matrix.

March 17-19, 2010

Three-day course FEE \$1,895 for CIMS affiliation* and \$2,095 nonaffiliated

** CIMS discount pricing applies for CIMS corporate sponsors, Babson College alumni, and companies registering three or more participants per course. Fees include all materials, lunches, and breaks.*

All programs are held at Babson Executive Conference Center on campus.
